FIELDWORK

Treviso (Italy), historic centre

- Casa Albergo, nursing home
- Borgo Mazzini Smart Cohousing, senior cohousing

MAIN OBJECTIVES

Promote a process of social intervention aimed at fostering the inclusion of older people living in nursing homes and seniors cohousing in their neighborhood through the creation of a caring community

DIAGNOSTIC TOOLS

- Observation
- Surveys
- Interviews
- Focus group
- Relational workshop

INTERVENTION TOOLS

- Community mapping
- Social safeness workshop
- New activities generation workshop

OUTPUT

Toolkit to implement caring communities

- To make recommendations on diagnostic and intervention tools based on the concrete experience of the AGORAge project
- To provide further resources (good practices, toolkits, other techniques) to foster the creation of caring communities.

This toolkit is for every researchers and practitioners dealing with social intervention as well as policymakers, service providers, and municipalities.

It is available in English, Italian, Spanish, Catalan.
